

# Sewing Skills Checklist

WASHINGTON STATE UNIVERSITY EXTENSION • C0677

# INTRODUCTION

Learning to sew is fun and rewarding! As with most things, the more sewing you do, the more skilled you'll become. Some techniques you will do frequently and feel confident of your mastery of them. However, sewing is an art where you will never learn all there is to know. What is important is to continue learning new skills and techniques.

This publication is designed for 4-H'ers enrolled in the Clothing Program. Its purpose is to help you plan sewing activities to constantly stretch your sewing abilities. Numerous sewing skills are listed, beginning with the basics and moving toward the more advanced. It is divided to correspond to the three Washington 4-H Clothing and Textiles projects: "Fun With Clothes," pg. 2; "Clothing Capers," pg.7; and "Clothes That Click," pg. 15. Keep the *Sewing Skills Checklist* as part of your records throughout your 4-H sewing years. By maintaining this record, you will see your sewing progress.

Using the *Checklist* is a 3-step process:

1. At the beginning of each 4-H year, go through the list of skills for the project you are enrolled in. Place a check (✓) in the "Skills I Know" column for all the skills listed you feel confident in doing.
2. Choose skills you want to learn or improve in the current 4-H year. Discuss these with your 4-H leader and parents. Determine what garments/items you will sew to learn those skills. Then check (✓) the skills you want to learn in the "Skills to Learn or Improve" column.
3. Once a skill is learned, place the date in the "New Skills Learned" column. You can also make a note of the sewing project where you applied the skill.

Skill List	Skills I Know	Skills to Learn or Improve	New Skills Learned Date/Item Sewn
Use self-bias		✓	9/98 (red checked jumper)
Attach round patch pockets		✓	6/97 (green print camp shirt)

Be sure to refer to the publication, PNW0197, *Measuring Up: Quality Standards in Sewn Items*, to evaluate your newly learned skills. It lists and describes specific characteristics that can be expected in high-quality construction. To evaluate your project using PNW0197, look up the different construction techniques (listed in alphabetical order) that you used. Compare your sewn item with the listed characteristics of high-quality construction. Many techniques can produce the same result. You may want to try several techniques for the same skill and determine which you like best. All may produce quality results, but one method may be easier for you to do than another.

Looking back over what you have learned in 4-H sewing will give you a great feeling of pride. Enjoy your experiences and keep a good record of your accomplishments. This publication will help you do just that!!

## HAPPY SEWING!!
